Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 1014 are objected to because of the following informalities:

Claim 10, line 4, the recitation "transmitting unit transmitting unit" should be changed to "transmitting unit".

Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 10-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nonomura (US 7,230,655) in view of Womack et al. (US 5,982,819).

Regarding claim 10, Nonomura discloses "a broadcast band transmitting unit, the broadcast band transmitting unit transmitting a broadcast band including performance item and signal groups identifying properties of the performance items, the transmitting unit including at least one digitally-encoded channel" in col. 2, lines 22-67; "a digital radio for demodulating and decoding the broadcast band" in col. 3, lines 45-55. Nonomura differs from the claimed invention in that Nonomura doesn't explicitly teach "broadcast band, the digital radio having a plurality of configurations, the digital radio assuming one of the pluralities of configuration in response to a selected signal group". However, Womack et al. discloses reconfiguring capability in the receiver

in Abstract; col. 3, lines 3-11; col. 3, line 64 to col. 6, line 7 to provide flexibility to the receiver, thus simplifying the circuit. Therefore, it would have been obvious to one skilled in the art at the time of the invention to incorporate such teaching in Womack into Nonomura to simplify the circuit in accommodating plurality of channel groups.

Regarding claims 11-14, these claimed subject matter would have been obvious to one skilled in the art as implementation specific based on the aforementioned combination.

Allowable Subject Matter

4. Claim 1-9 are allowed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lownes et al. (US 6,137,539) discloses Digital Television Status Display.
